

CE Marking

Pressurised equipment

As of May 29th 2002, all pressurised equipment in the EU must be evaluated - and possibly CE marked - according to the directive 97/23/EU (known as PED).

Compared to previous requirements regarding approval of pressure vessels and pressurised equipment, PED is far more extensive and differs in several crucial areas.

MGT Liquid & Process Systems Ltd. can offer our customers up-to-date, comprehensive knowledge regarding PED.
